

Administrative Parcel

Contiguous Ownership
Used for Tax Billing, Current Use. etc.

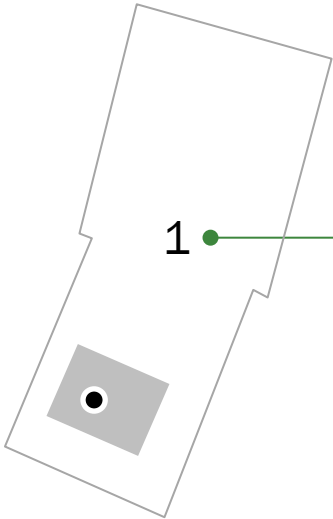

MAPID: 1110-0022.0000
PARCEL ID: 1110-0022-0000
SPAN: 036-011-11979
ADMINSPAN: 036-011-11979

Parcel

Formerly “Inactives”
Index of documented areas in land records

MAP ID: 1110-0022.0000
PARCEL ID: 1110-0022-0000
SPAN: 036-011-11979
ADMINSPAN: 036-011-11979

3	ADMINPARCL	COMBINED	036-011-11979	<null>	<null>	A	5.00	2	1	A	YES

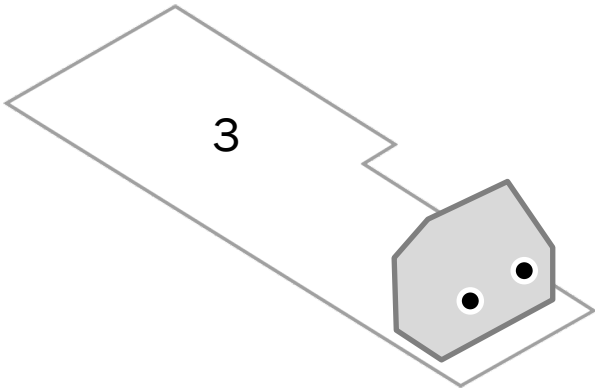

Multi-Parcel Condition, “Horizontal” / “Surface”

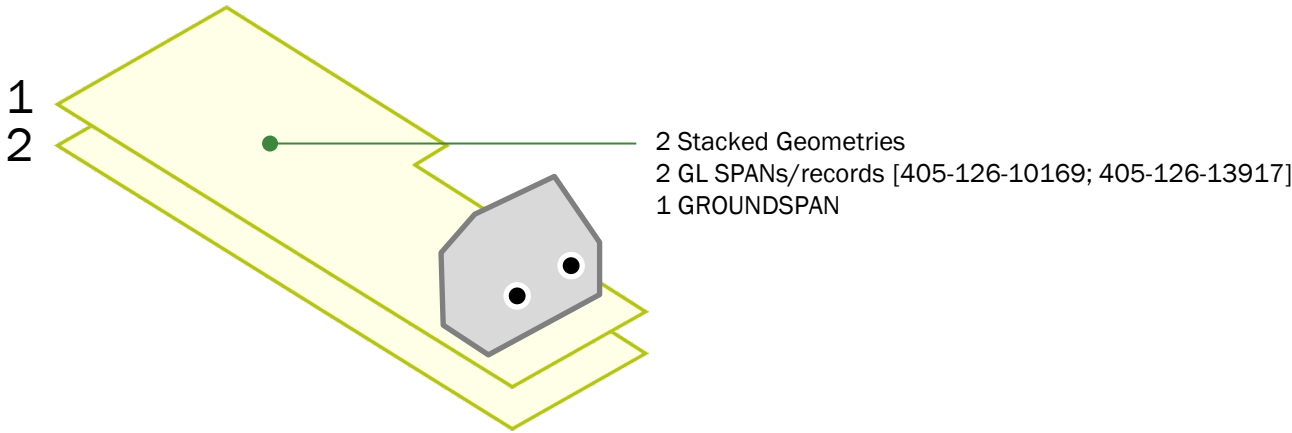

Parcel

Common Ownership (e.g., Condo)

Administrative Parcels

Unlanded Ownership (e.g. Condos)
Index of documented areas in land records,
parcel count to match record maintenance,
used for Tax Billing

	KIND	TYPE	ADMINSPAN	SPAN	GROUNDSPAN	LOCALID	LISTED_AC	PARCLCOUNT	DWELLINGS	OWNER1	TAXBILL
1	ADMINPARCEL	PARTSTACKD	405-126-10169	405-126-10169	405-126-13918	A.1	2.50 (or 0)*	1	1	A	YES
2	ADMINPARCEL	PARTSTACKD	405-126-13917	405-126-13917	405-126-13918	A.2	2.50 (or 0)*	1	1	B	YES

6	ADMINPARCL	PARTSTACKD	405-126-13921	405-126-13921	405-126-10169	A.6	0.17 (or 0)*	1	1	F	YES
7	PARCEL	COMMON	405-126-10169	405-126-10169	405-126-10169	A	1	6	6	G* (varies)	NO

Multi-Parcel Condition, “Vertical” / “Stacked”. Example Condo Condition

1. Structural/Relational Fields (addressing [H.933](#))

These fields decouple the physical lot from the taxable entity, while allowing the taxable entity to be related with/derived from physical lots.

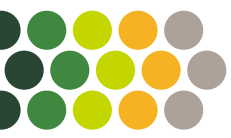

New Attribute	Purpose & Definition	Domain / Values
KIND	Differentiates physical mapping entities from tax billing entities.	PARCEL , ADMINPARCL
TYPE	Categorizes the specific sub-type of the multi-record condition.	PARTSURFCE , PARTSTACKD , COMMON
ADMINSPAN	The parent key for horizontal conditions. Links contiguous sub-lots (TAXBILL = NO) to their aggregated billing record (TAXBILL = YES).	Valid SPAN
GROUNDSPAN	The foreign key for vertical conditions. Links unlanded units (TAXBILL = YES) to their underlying common ground polygon (TAXBILL = NO).	Valid SPAN
TAXBILL	Boolean flag indicating if the record generates an actual tax bill, preventing double-billing.	YES , NO
PARCLCOUNT	Integer indicating the number of "separate and sellable" lots for State funding calculations.	Integer

2. Valuation & Classification Fields (addressing [H.955](#))

These fields support the transition from a binary tax classification to a three-tier, proportionally allocated system.

New/Modified Attribute	Purpose & Definition
NRES_RES_FLV	Splits out the Nonhomestead Residential Full Listed Value.
NRES_NONRES_FLV	Splits out the Nonhomestead Nonresidential Full Listed Value.
FLR_PCT_HS	Percentage of finished floor space allocated to Homestead.
FLR_PCT_NR	Percentage of finished floor space allocated to Nonhomestead Residential.
FLR_PCT_NN	Percentage of finished floor space allocated to Nonhomestead Nonresidential.

3. GIS Implementation Changes

- **Elevating "Inactives":** The legacy "inactive" geometry layer becomes the active, primary mapping layer representing all "sellable lots," as defined by H.933.
- **Retiring Complex SQL Joins:** By embedding relational keys (ADMINSPAN, GROUNDSPAN) directly into the Grand List, complex SQL stored procedures (like the multi-join [JoinGL2Parcels](#)) can be drastically simplified or retired.
- **Update of Parcel Data Standard, Guidance, and Templates;** possible new tools, working with vendors to implement
- **CAMA Data Integration:** updates in records identification and management permit reliable relationship with detailed CAMA property info; per recent legislative requirement of [32 V.S.A. § 5404](#)
